

# RiEX Children's Garden Initiation!

455 Main Street

June 9<sup>th</sup>, 2012

Our children's garden initiation was filled with so much collaboration, creativity, and innovation from the children and families. Children explored, brainstormed, and created a beautiful vision for this exciting community project!

Children used an assortment of materials to communicate their vision for the garden. They strategically placed representations of flowers, created informational signs, and began planting a variety of seeds.

Children and families worked together with different types tools to prepare sections of the garden for future planting. As they dug, children discovered worms, grubs, and other critters that are native habitants of the garden! We look forward to seeing what else the children discover!

We hope you will continue to observe and interact with the garden throughout your week!

Please send us photos and comments from your children related to the garden.
